5- Only one that I find that works for me at all Either way, still hit or miss GBA/GB/GBC- XBoy Advance- Runs awesomely.. Surreal64 CE B5 5 Update Information Update Boxart Add Screenshots Add Video Report File This is the newest version of Surreal64.. Revolt Stable but very slow settings: Emu:1964x085 Dyn 9 page 0 lasted with no crashing with max video mem 5or4, so far only setting that does not crash) Best full speed of the rom I could trouble shoot is: Emu:pj64x16 video plug: rice 5.. 6 0 dyn: 9mb Page:12mb actually plays normal speed for 10 seconds or more after 'GO' on starting a race. Download 2012 Calendar Template For Publisher
 I know this is an old post but it says compatibility list, so I figured I would slip something in here having to do with compatibility of roms:) REVOLT for n64, I tried getting this one working for quite a while If any one has any better performance settings for this rom please post:) or other roms that aren't in current compatibility lists, these are better settings for the rom then I could find any where else. Indesign Cs6 Mac Crack
